

Product Standards and Guide Specifications

1995 CSI SECTION 08160 SLIDING METAL DOORS 2004 CSI SECTION 08 32 13 SLIDING ALUMINUM - FRAMED GLASS DOOR (Window Walls/Ribbon Walls)

PART 1 General

1.01 Summary

- A. Section includes:
 - 1. Sliding Metal Doors
- B. Related Sections:
- 1.02 References
 - A. American Architectural Manufacturers Association (AAMA)
 - B. American Society for Testing and Materials (ASTM)
 - C. National Accreditation & management Institute (NAMI)
 - D. National Wood Window & Door Association (NWWDA)
- 1.03 System Description
 - A. General: In addition to requirements shown or specified, comply with:
 - 1. Applicable provisions of AAMA Windows and Sliding Glass Doors Manual for design, materials, fabrication and installation of component parts.
 - B. Design Requirements: Arcadia ULT5000IP Series SGD-DP -/+ 70 psf -Small & Large Missile Impact using 1-1/16" Laminated Insulated Impact Glass. Arcadia ULT5000IP NI Series SGD –using 1" IG temp Glass -DP -/+ 60 psf (@ 8'6" tall panels) –Higher DP performance pressures available based on door size and configurations.
 - C. 2 panel configuration only tested.

1.04

Sliding Glass Doors 4 ½" (5 ¼" depth w/screen).

- Performance Requirements: Each assembly shall be tested by a recognized testing laboratory or agency in accordance with specified test methods.
 - 1. Conformance to & ASTM E1886/1996
 - (Small Missile & Large Missile) & AAMA/WDMA/CSA 101

NFRC tested for:

-NFRC 100-2004 for fenestration U factors. -NFRC 200-2004 for fenestration solar heat gain coefficients & visible transmittance at normal incidence. -NFRC 500-2004 for fenestration condensation resistance values.

a. Air Infiltration: Accordance with ASTM E 283.

b. Water Resistance: Accordance with ASTM E 331. 1.05 Quality Assurance

- A. Single Source Responsibility:
 - 1. Obtain entrances, storefronts, ribbon walls, window walls, curtain walls, window systems, and finish through one source from a single manufacturer.
- B. Provide test reports from AAMA & NFRC accredited laboratories certifying the performances as specified in 1.03.
- 1.06 Warranty
 - A. Warranted against failure and/or deterioration of metals due to manufacturing process for a period of one (1) year.

PART 2 Products

- 2.01 Manufacturers
 - A. Acceptable Manufacturers:
 - 1. Arcadia Architectural Products, Inc., 60 Bonner Street, Stamford, CT. 203-316-8000, fax 203-316-8200.
 - B. Acceptable Products:
 - Arcadia Series ULT5000IP Impact (Small & Large missile impact) – Arcadia Series ULT5000IP-NI Sliding Glass Doors - 4 1/2" (5 1/4" depth w/screen).
- 2.02 Materials
 - A. All doors shall be fabricated from aluminum extrusions of 6063-T6 alloy and temper with a minimum wall thickness of 0.100" for the sill member and a minimum of 0.072" for all other members, including frame & sash. The aluminum shall be free of defects which impair strength and appearance.

ULT5000IP Series

(Thermally Broken) Small & Large Missile Sliding Doors 4 ¾" (5 ¼" w/Screen) Depth

All panel members will have a minimum .625" glass penetration (ULT5000IP Small & Large Missile) .625" glass penetration into the aluminum to provide extra protection against de-glazing or blow out in high wind conditions.

- B. Component parts and accessories shall be of aluminum alloy, stainless steel or non-metallic materials, which will neither deteriorate nor promote corrosion.
- C. Sill shall have a full length roll-formed 0.028" thick stainless steel track cap. Sill shall have a full-length roll-formed 0.028" thick stainless steel track cap.
- D. Operable sash shall be equipped with two stainless steel tandem ball bearing roller assemblies.
- E. Fully Stainless Steel Locking device Adams-Rite maximum security lock MS+1950 with hook bolt standard.
- F. Operating panels shall have an extruded 3/4" diameter 8" O.C. aluminum wire pull handle set in either clear or black anodize finish – other colors available.
- G. Fixed and/or sliding sash members shall be constructed to allow for either factory or field glazing. Sash glazing shall be "Dry" & accomplished using a "marine" style reusable, wraparound black flexible polyvinyl chloride (PVC) or EPDM material per commercial standard CS230-60 without the need for separate glazing beads or putty style bedding compounds. The glazing channel shall be provided with the unit for 1-1/16" Insulated Laminated Glass.
- H. All assembly and installation screws shall be 18-8 or 410 stainless steel.
- Screens Optional Shall be Interior Sliding made of extruded aluminum frame and screened with 18 x 16 fiberglass mesh. (5 ¼" Frame Depth Overall)

2.03 Finish

- A. Finish all exposed areas of aluminum and components as indicated (excluding hardware):
 - 1. Clear Anodized Class 1 (215R1-0.7 mils thick) meeting AAMA 611.89
- (or) 1. Dark Bronze Anodized Class 1 (0.7 mils thick) meeting AAMA 611.89
- (or) 1. Custom colors in a baked-on enamel or Duranar finish are also available – AAMA 2604.98 and AAMA 2605.98 subject to minimum square footage requirements.
- 2.04 Fabrication
 - A. Jambs are cut and square butt joined to sill & head to ensure a weather resistant seal & must be back caulker.

PART 3 Execution

3.01 Examinations

- Examine conditions and verify substrate conditions are acceptable for product installation.
- 3.02 Installation
 - A. Install in accordance with approved shop drawings and manufacturers installation instructions.
- 3.03 Field Quality Control
 - A. Contractor's responsibility to make all necessary final adjustments to attain normal operation of each door and its mechanical hardware.

END OF SECTION
