1.03 System Description

- A. General: in addition to requirements shown or specified, comply with:
 - Applicable provisions of AAMA Aluminum Storefront and Entrance Manual for design, materials, fabrication and installation of component parts.
- B. Design Requirements: Arcadia IPAFG451 Series is a framing system suitable for outside or inside glazing.
- C. Performance Requirements:
 - Conformance to ASTM 1886/1996 (Small Missile & Large Missile) & AAMA/NWWDA 101/I I.S. 2-97 (Non Impact).
 - Limit air leakage through assembly to 0.06 CFM/min/sq. ft. (.00003 m³/sm²) of wall area at 6.24 PSF (300 Pa) as measured in accordance with ASTM E283.
 - Water Resistance: No water leakage when measured in accordance with ASTM E331 with a static test pressure of 15 PSF(384 Pa).
 - Limit mullion windload deflection of L/175 with full recovery of glazing materials, when measured in accordance with ASTM E 330.
 - System shall not deflect more than 1/8" at the center point, or 1/16" at the center point of a horizontal member, once deadload points have been established.
 - System shall accommodate expansion and contraction movement due to surface temperature differential of 180 degrees F.
 - Seismic testing shall conform to AAMA recommended static test method for evaluating performance of curtain walls and storefront wall systems due to horizontal displacements associated with seismic movements and building sway.

1.04 Quality Assurance

- A. Single Source Responsibility:
 - Obtain entrances, storefronts, ribbon walls, window walls, curtain walls, window systems, and finish through one source from a single manufacturer.
- B. Provide test reports from AAMA accredited laboratories certifying the performances as specified in 1.03.

1.05 Warranty

A. System shall be warranted against failure and/or deterioration of metals due to manufacturing process for a period of two (2) years.
